March 2, 2016

Ms. Sabrina Bartsch
FEV GmbH
Gothenburg
Sweden.

Dear Ms. Sabrina Bartsch

I write with reference to the Calibration Engineer, as posted in your careers website. I enclose my CV for your information. The job posting mentions the pre-requisite for expertise in engine calibration with the related Master's degree. I am currently pursuing Master of Science in Powertrain engineering at IFP school, France and will be graduating by the end of June.

You will note from my CV that I also have relevant work experience in this area, having undertaken the calibration of off highway engines as a senior application engineer at Robert BOSCH India Limited, in 2015. Before joining BOSCH, I have worked as a Lead engineer in the engineering application of turbochargers for various engine segment at Turbo Energy Limited (TEL), in 2014. During my tenure at BOSCH I learnt and worked on calibration of engines. With the experience before hand in the turbochargers and my involvement in the testing of engines as a resident engineer at TATA motors with TEL equipped me with thorough knowledge in engine testing.

As part of my graduate studies here in France, I got an opportunity to study in a multi-cultural environment with fourteen different nationalities in a class of twenty-nine. Not only my program, but also the entire school is represented by students from various countries. Over the course of my study, we were given project activities with the mix of different nationalities, mainly to accentuate the importance of cross-culture method of working and understanding.

At IFP School, we were exposed to recent technologies on after treatment systems, engine modeling in MATLAB and powertrain testing and calibration to name a few. Am interested to learn Swedish, as it not only enables to communicate with my fellow colleagues, but also to understand the culture of the country. With my professional experiences and masters related to this domain, I believe that I have a lot to offer FEV GmbH and hope I have sufficiently conveyed my potential for the role.

Sincerely,

SANTHOSH BABU THOPPE NATESH BAPU
